

PRESS RELEASE DATE 15/03/2019

GOINTERNATIONAL FINLAND PRESENTS EDUTEN PLAYGROUND No. 1 DIGITAL LEARNING PLATFORM. FROM FINLAND

The first ever Finnish Digital Learning Platform Education Innovation, a flagship initiative of GOInternational Finland's Nepal under the Nepal - Finland Innovation Cluster Project will be launched with key stakeholder representatives, at an event in Hotel Annapurna, King's way, Kathmandu, Nepal on March 19, 2019.

With the rapid growth of the middle class and the youth population occupying half of the total population, Nepal is emerging as an important growth market, especially in the area of international education. Between 2016-2020, Finland is actively supporting Nepal's education sector by means of a [EUR 20 million investment](#) for the development of quality education and for the reduction of inequality. According to the Ministry for Foreign Affairs of Finland in 2017, education is the second of Finland's three main targets of support in Nepal.

The exposure of Finnish education - world's top education to the target country's youngsters will directly improve the country's education level. It includes the transfer of expertise and skills, which plays an important role in nurturing the country's future leaders and training for high-educated skillful labour force of the future.

“When citizens of a society are educated, they provide significant contributions in the fields of arts, literature, science, technology, and elevate the whole nation. Education makes everyone a valuable and contributing member of the society community. It also makes you aware of your rights and responsibilities towards the society, making the country more lawful and peaceful. It lets people exist in harmony. Educated people are the backbone of business and economy. Top education is essential to get a competitive advantage in the global economy”. Eduten.

At this historic event, we will bring them all together under the same roof to present the world's best education system to Nepal. We have partnered with Paragon Public School inviting 70+ top Nepalese schools. Along our CEO Mr. Shabbir, CEO of Eduten Mr. Muurimaa himself will be presenting on how to take steps towards the world's best education system for our Nepalese schools with Eduten's scientifically proven improvement to learning results, student motivation and grades. In one recent University study Eduten Playground improved the mathematics performance of the students by 39% and arithmetic fluency by 45% compared to the control group. Eduten is a spin-off of University of Turku that is ranked globally among top 1% universities. Eduten promotes digital learning platform called Eduten Playground to students all over the world. It is used in 34% of Finnish schools and supported by Finnish government.

We are also thrilled to announce that [Paragon Public School](#) making *history* by becoming the *first* school ever in Nepal to adopt the No. 1 Digital Learning Platform. From Finland. It's a first step for Paragon but a giant step for students of Paragon who now have the exact same tools to learn as the students of best education system in world.

GOInternational Finland's mission is to unlock the greatness of Finnish/Nordic innovation and get it exposed to the global. With its [platforms](#) and Internationalisation Programmes, GOI Finland wishes to bridge appropriate stakeholders and develop co-creation partnerships between Finnish and Nepalese forward looking innovative organisations.
